

Basic installation guide for NEC InfinityBoard

Unpacking the box

- 65" or 84" UHD Touch Display
- Huddly camera
- Conference speakers
- OPS Slot-in PC
- Passive Precision Pen
- NEC MultiPresenter Stick

Connecting the Huddly camera

1. Connect the Huddly camera to the NEC OPS using the 1-meter angled cable to an available USB port.

2. The placement of the Huddly camera.

Install the Huddly camera and adjust the right placement before screwing it in.

3. Check the Huddly application.

When you have everything installed and properly running, check the Huddly application that comes pre-installed on the NEC OPS running Windows 10. The app is designed to receive updates and get the latest features for the camera. It is also used to do perform digital PTZ and adjust the brightness and colour.
