Huddly Driver Manager Installation Guide

This guide describes the installation process for the Huddly Driver Manager on macOS in order to use the Huddly L1 and Huddly S1 cameras.

Requirements

- macOS 12.3 or later (Monterey or Ventura)
- Huddly L1 or S1 camera

Download

Go to <u>https://www.huddly.com/setup/</u> and follow the instructions for your camera and download the macOS driver from **Step 2**.

Installation

Run the installer you downloaded and go through the install process.

If the **Huddly Driver Manager** doesn't start automatically after install, please go to **Applications** and run the **Huddly Driver Manager**.

You will need to activate both Camera and Network Driver for your Huddly L1 or S1 camera to work on macOS.

Both driver	s need to be activated to run	the camera
▣	Camera Driver Not installed	Activate
	Network Driver Not installed	Activate

Click Activate and select **Open System Settings** and **Allow** and type in your password. Do this process for both Camera Driver and Network Driver.

You have now completed the installation of the drivers for Huddly L1 and Huddly S1 cameras.

 \times

You can now select Huddly L1 or S1 within your video client of choice.
